

ARCOS Application Changes - Production 19.30

July 2019

Changes will be deployed to production on Thursday, July 25, 2019

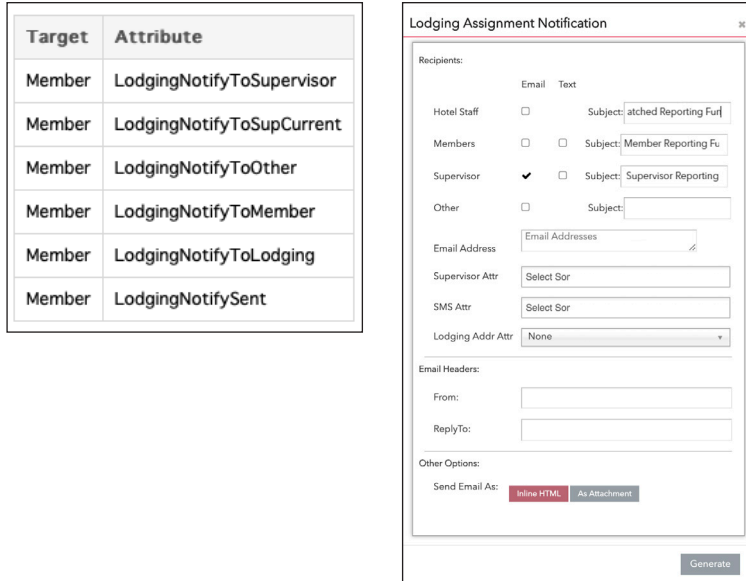

| | |
|---|----------|
| ARCOS CREW MANAGER ENHANCEMENTS | 2 |
| Added New Lodging Member Attributes and Notifications | 3 |
| ARCOS sSMART ENHANCEMENTS | 4 |
| Updated Column Settings to Remain Persistent Between Browsers | 5 |

ARCOS Crew Manager Enhancements

Added New Lodging Member Attributes and Email Notifications

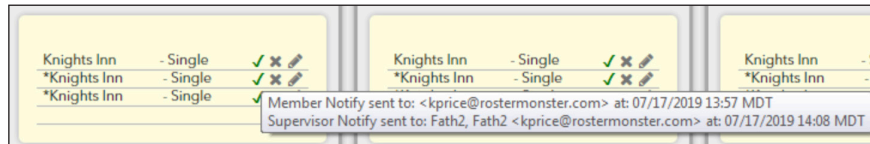

What is changing:

ARCOS has added six new “LodgingNotifySent” Attributes to track which type of Lodging emails have been sent when selected from the Lodging Assignment Notification window.

The Lodging attribute must be included in the View Set in order for these new attributes to function.

An indicator  has been added to the Lodging Assignment Panel to confirm the email was sent. Hover over the indicator to view the details.

Why are we making this change:

This change is being made to allow users to verify to which recipients a lodging assignment notification email, since not a requirement, was sent and when.

Who is involved:

All ARCOS Crew Manager customers will receive this update.

What you need to do:

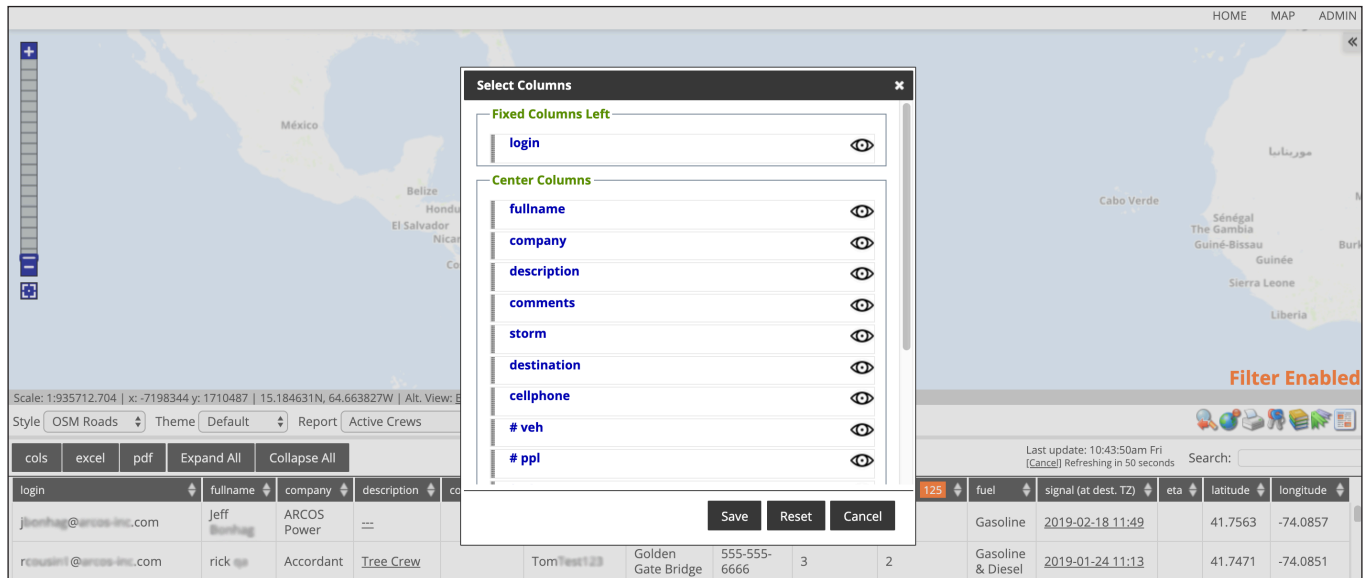

No further action is necessary to implement this change.

ARCOS sMART Enhancements

Updated Column Settings to Remain Persistent Between Browsers

What is changing:

ARCOS has updated Column settings with SMART to remain persistent between browsers.

User column preferences set within one browser will remain the same for that user when logged in on a different browser.

Why are we making this change:

This change is being made to allow for user consistency between browsers.

Who is involved:

All ARCOS SMART customers will receive this update.

What you need to do:

No further action is necessary to implement this change.
